Outlook for Fourth Quarter of Fiscal Year 2014

The Company does not expect to generate any revenue in the fourth fiscal quarter of 2014. Based on the initial success of the China Mobile/UMFun partnership development, the Company expects to generate revenue in the first fiscal quarter of 2015. This forecast reflects UMeWorld's current and preliminary view, which is subject to change.

Liquidity and Capital Resources

Since inception, the Company has financed operations primarily from the issuance of Common Stock. The Company expects to continue Common Stock issuances and issuance of promissory notes to fund its ongoing activities.

The Company currently does not have sufficient resources to carry out its entire business strategy. Therefore, the Company will need to raise additional capital to fund its operations sometime in the future. The Company cannot be certain that any financing will be available when needed. Any additional equity financings will be dilutive to its existing stockholders, and debt financing, if available, may involve restrictive covenants on its business and also the issuance of warrants or conversion features which may further dilute its existing stockholders.

The Company expects to continue to spend capital on:

1. marketing and brand promotion of UMeLook.com; and
2. development, sales and marketing activities related to UMFun.com, its digital education platform.

The inability to raise capital would have a material adverse effect on the Company.

Internal Control over Financial Reporting

During the three-month period ended June 30, 2014, there were no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
